Experience

eClinicalWorks
Business Intelligence Engineer Aug 2025 – Present

- Built a text-to-SQL agent and semantic layer for anyone in the company to use. An LLM generates Cube queries, validated by Pydantic.
- Stack: SQL Server with CDC and SQL Agent, dbt, Cube Core, FastAPI, React, ECharts and TanStack Table.
- Used Codex-based agents on Azure Pipelines to parse call transcripts, the report repository and its documentation into YAML and Markdown.
- Used that output with hybrid retrieval and a live database connection to build the semantic layer, with 400K rows of context.
- Migrated and partitioned 400M+ rows from SQL Server into MySQL.
- Built a prediction engine for return visits with a logistic GAM, using visit history, visit types, diagnoses and provider.
- Analyzed multi-year scheduling data to recommend appointment lengths, which reduced wait times by 10%.
- Set up an Azure pipeline for product usage data with bronze, silver and gold layers.

ZF North America
Data Engineer Intern May 2024 – Dec 2024

- Compared 5+ time-series models for 13K+ SKUs, including Temporal Fusion Transformers, XGBoost and Prophet, and built the forecasting framework on Prophet.
- Reduced annual demand forecast error by 7% and automated 20+ hours of monthly manual work.
- Set up a Databricks workflow with Unity Catalog that detects Azure Data Lake file drops and ingests customer data in under 3 minutes.
- Co-developed a GenAI chatbot for vehicle parts questions on Azure Cognitive Search and GPT-4o, and prepared 50K+ unstructured files for it.
- Made Power BI dashboards of the forecasts that helped executives identify $100K+ in cost-saving opportunities.

Daimler Truck Innovation Center India
Data Engineer Aug 2022 – Aug 2023

- Cleared a 7-month backlog of data discrepancies in a Power BI solution with DAX and SQL fixes, saving 40+ hours a month of manual validation.
- Built a Power BI tracker for department name changes across 12 international markets.
- Led a team of 4 moving 5,000+ project records from Excel to Dataverse for a model-driven app. Project update response rates went up 15%.
- Automated the migration of 2K+ work items to a new DevOps platform with Selenium, which cut the team's time by 50%.
- Resolved 50+ issues across Angular, .NET and SQL. Average bugs per sprint dropped 25%.
- Helped set up a Power Platform team, including candidate interviews and business discovery.

Software Engineer Intern Mar 2022 – Aug 2022

- Built a full-stack scheduling tool for Agile sprint planning with Angular, a .NET API and SQL Server.

Projects

- **Hybrid restaurant recommender.** Combines three Bangalore restaurant datasets and ranks restaurants by cuisine, area and budget. Python, pandas, scikit-learn, SciPy SVD.
- **Norman PD incident pipeline.** Pulls police incident PDFs into structured data and adds weather, location and frequency rankings. Python, PyMuPDF, SQLite, Regular expressions.
- **Censor tool.** Command-line tool that redacts names, dates, phone numbers and addresses from text files. Python, spaCy, Google Natural Language API, PyAP.

Education

University of Florida, MS, Computer and Information Science and Engineering, GPA 3.96 Aug 2023 – May 2025
Dayananda Sagar College of Engineering, BE, Computer Science and Engineering, CGPA 8.66/10 Aug 2018 – Jul 2022

Skills

Data engineering: SQL, T-SQL, dbt, Databricks, Unity Catalog, SQL Server CDC, Medallion Architecture, Power BI, DAX
AI and ML: Semantic layers, Text-to-SQL agents, Hybrid retrieval, Cube Core, Azure Cognitive Search, Prophet, XGBoost, Logistic GAMs, spaCy
Languages and backend: Python, FastAPI, Pydantic, TypeScript, C#, .NET, SQL Server, MySQL
Frontend and tools: React, Angular, ECharts, TanStack Table, Azure, Azure Pipelines, Power Platform, Selenium, Git
